DETAILED ACTION

Allowable Subject Matter

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a proactive security system. Each independent claim identifies the uniquely distinct feature of "performing a restoration procedure within a proactive server by restoring the common public proactive key V_{cert} using the non-proactive public key V_{start}^i of the proactive server undergoing the restore process." The closest prior art, Frankel et al (US 6,237,097) and Arbaugh et al (US 6,185,678) disclose a conventional proactive security system, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 13-25 are rejected under 35 U.S.C. 101 because the claimed invention is not a "process" or a "machine," but rather embraces or overlaps two different statutory

Art Unit: 2137

classes of invention set forth in 35 U.S.C. 101 which is drafted so as to set forth the statutory classes of invention in the alternative only. *Id.* at 1551.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. A single claim which claims both an apparatus and the method steps of using the apparatus is indefinite under 35 U.S.C. 112, second paragraph.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

A. Barak et al, "The Proactive Security Toolkit and Applications", discloses a proactive security system that allows server to recover from penetrations by attackers.
